Legal & General - Investment Management

Project Overview

Customer Sector

**Finance
Industry**

Environment

**10,500,000
Messages**

Products/Solutions

**TransVault
Migrator**

Services Delivered

Migration

Requirement

Legal & General - Investment Management is a UK based investment company with an array of clients and a large workforce. The Client approached TrueSwift in 2018 with the need to migrate 653GB of data in the form of 10,400,000 messages.

The migration source was a number of Exchange public folders that had been archived by Enterprise Vault. The migration target was the original on-premises

Project Engagement

The Client engaged with TrueSwift to provide specialist consultancy services to migrate 653GB / 10.4M messages from a number of public folders they possessed to their original on-premises Exchange folder. The project goal was to visit the customer site to and install TransVault Migrator software on a dedicated migration server.

This was a fully-managed migration but with the infrastructure being hosted on customer site. Following the installation, the software was configured and migration tasks created for the public folder migration. All migration work was then carried out via a secure, remote connection.

A technical challenge that our team had to overcome was 'auto-reply' folder rule customisations on the public folder mailboxes that could be triggered on mailbox changes with adverse effects. This was solved by our consultants and the migration completed successfully.

Benefits

- TrueSwift delivered a plan to achieve the migration of over 10.4 million messages from public folders to Exchange mailboxes. The Client received expert knowledge pertaining to this type of project.
- The Client objectives were achieved in a timely manner.
- The Client received a flexible approach to the migration that fitted in with the demands of their day to day working.

Customer Testimonial

“From start to finish TrueSwift and their expert consultants provided us with a high quality service and very useful knowledge in email data management. The project requirement that we set TrueSwift was to migrate 653 GB of data in the form of 10,400,000 messages from a number of Exchange Public Folders archived by Enterprise Vault to our original on-premises Exchange Server. A difficult and large task that was handled efficiently and effectively by Steve Sloane our designated TrueSwift consultant.

I'd be happy to recommend TrueSwift and we will look to use them again for data management projects and requirements going forward” - Chris Hall - Interim Head of Technology Engineering

TrueSwift

TrueSwift delivers expert Information and Data Management solutions. As independent specialists, we focus in 4 key areas and leverage our significant experience in delivering complex data solutions to aid business improvement and cost efficiency. Through carefully selected partners, we are also able to offer an array of further solutions for our customers.
