

Archiving and e-Disclosure

Unrivalled pedigree in the Symantec Enterprise Vault archiving and e-Disclosure space

TrueSwift consultants have been delivering complex, enterprise archiving solutions to over 500 customers since 1997.

Our team has delivered global EV projects of all sizes and complexities across all market sectors from 10 seats to 110,000+ seats. As a Symantec Consulting Services spin-off company, TrueSwift has significant experience in delivering large, enterprise-scale projects for customers including BMW, BP & Barclays.

Due to our work in the Government/public sector, TrueSwift has a large proportion of consultants with UK SC clearance.

Compliance and e-Disclosure requirements are expanding in EMEA. TrueSwift has been active in implementing these EV modules and delivering training to customers' Legal, HR and Compliance teams in the UK, EMEA and the US. We also provide specific, case-related assistance to customers with immediate e-Disclosure requests, guiding the customer through the discovery process from initial search to document production.

Skills and Services

- Health-checks and System Assessments
